\$1,990 up to 10 students

MP2 Materials

2 Days - Includes detailed instruction and hands-on exercises of the Inventory and Purchasing modules in MP2. Functional demonstrations and hands-on exercises provide attendees a foundation for using the MP2materials functions.

\$1,990 up to 10 students

The EAM MP2 "Maintenance" class and "Materials" classes combined equal the "Complete" class.

The "Complete" should be taken before the "Advanced" class.

MP2 Advanced

3 Days -Provides guidance and hands-on exercises in advanced utilization of MP2 to improve maintenance operations. Includes advanced topics such as defining and creating metrics and basic reporting to monitor the status of those metrics. Attendees will participate in hands-on sessions for various features in MP2used to implement maintenance best practices.

\$2,985 up to 10 students

MP2 Custom

Variable Days - Combine elements of the classes above, or define your own areas such as how to set up Equipment, how to find data, save queries, modify user settings to meet your needs, reporting basics, how to see the data you seek, and more. This agenda can be agreed upon in advance or generally defined, then discovered as the class unfolds.

\$995 per day up to 10 students

All Classes are reserved with payment in advance (USD) / Instructor travel is quoted separately

Single student pricing is available upon request

All Classes are reserved with payment in advance (USD) / Instructor travel is quoted separately

Comparison: On-Site or On-Line Training?

- On-Site Training gives your users and team the contextual framework for setting up the MP2 System.
- On-Site Training also includes instructor supervised hands-on exercises to ensure that the material is absorbed and repeated.
- On-Line Training is a step-by-step instructional experience.
- On-Line Training includes exercises assigned as homework to be completed between sessions, non-supervised.
